

The screenshot displays the GateAccess.NET website interface. At the top, the header reads "GATEACCESS.NET" with a navigation menu including: Overview, Contact Info, Guest List, Entry Logs, Emergency Contacts, Vacation Notification, Pets Information, Vehicles, Login Information, Vendors, Contractor Portal Admin, and FastAccess Passes. The main content area is titled "ABDi FastAccess Pass" and features a "Send Now" button. Below this, there is a "Your COMMUNITY" logo. The pass details are as follows:

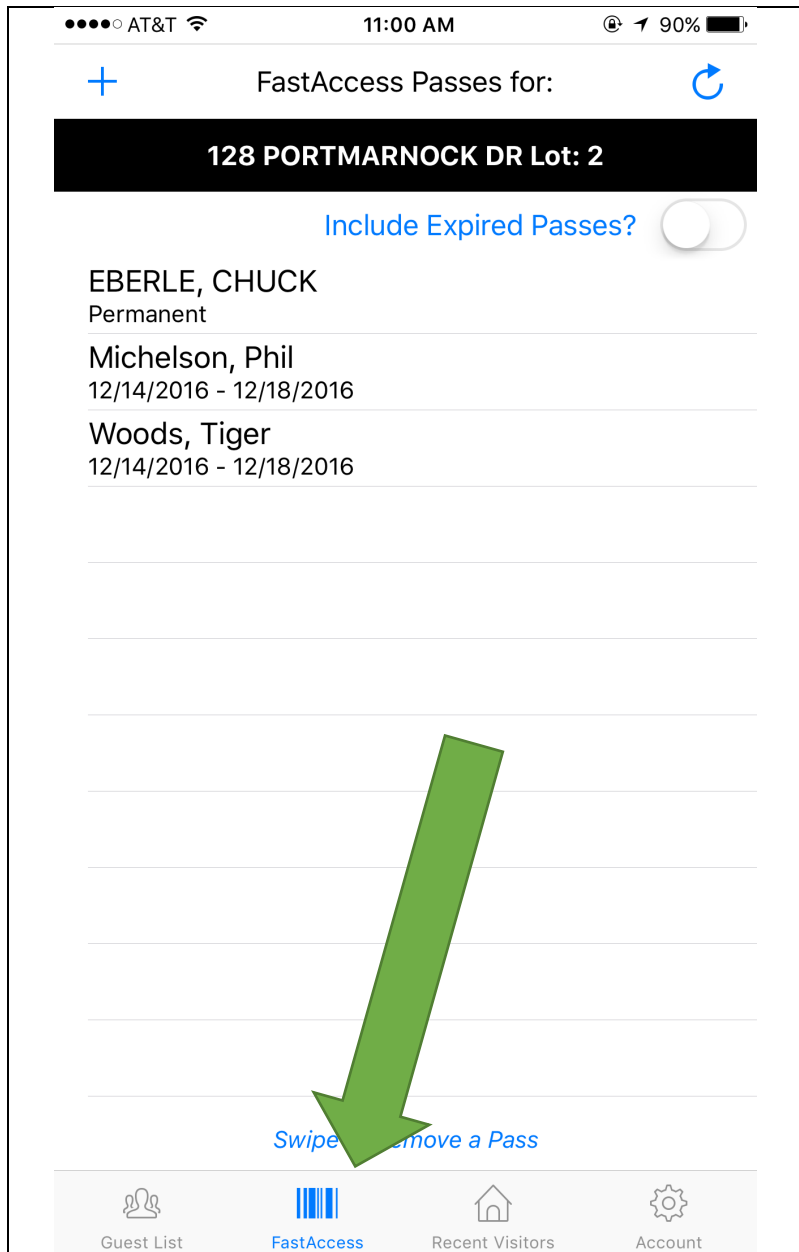

Guest Name:	TIGER WOODS
Valid From:	PERMANENT
Destination:	128 PORTMARNOCK DR

A QR code is displayed below the destination information. At the bottom of the pass, there is a section for "Your custom text here..." and a "Speed Limit" of 10. The pass is powered by "ABDi GATEACCESS.NET". To the right of the pass, there is a table with columns "Emailed?" and "Sent":

View/Send Voucher	Emailed?	Sent
View/Send Voucher	No	
View/Send Voucher	No	
View/Send Voucher	No	
View/Send Voucher	No	

GateAccess FastAccess Module

Having subscribed to our FastAccess service of GateAccess.NET, a new section on the GateAccess.NET website is revealed. This section allows residents to send "FastAccess Passes" to any e-mail address of their choosing.

GateAccess Mobile App (iOS & Android)

Having subscribed to the FastAccess service of GateAccess.NET, a section on our mobile apps is revealed. This section allows residents to add "FastAccess Passes" to their account.

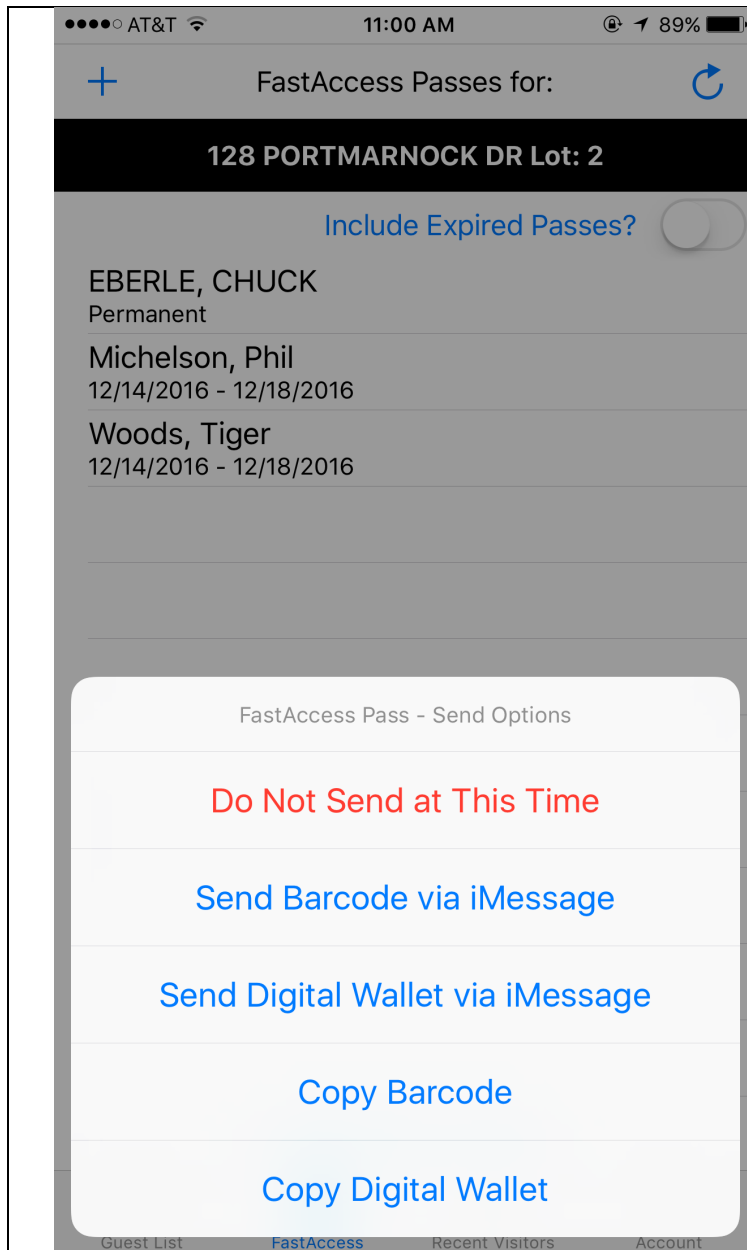

Depending on your setup within the community FastAccess passes can be read by Outdoor Barcode Scanners, iPads (using our ABDi iCMS app) & Desktop Computers (using ABDi CMS).

The screenshot shows a mobile app interface for adding or editing a pass. At the top, there are three buttons: "Cancel" (red), "Delete Pass" (red), and "Save/Send" (green). Below these are two text input fields: "Woods" and "Tiger". A section titled "Notes for Security" contains two date input fields: "12/14/2016" and "12/18/2016". There are two toggle switches: "Permanent?" (currently off) and "Specify Number of Times Allowed?" (currently on). Below the second toggle is a numeric input field with the value "1" and two buttons: a minus sign (-) and a plus sign (+).

Adding/Editing FastAccess Passes

Residents can set a pass as “Permanent” or with an Expiration Date.

Once saved, the app will prompt for sending options.

FastAccess Pass Sending Options

Send Barcode via iMessage/MMS:

This option attaches a fully customizable image to a new iMessage/SMS on the user's smartphone to send to their guest.

Send Digital Wallet via iMessage

This option attaches a link to a new iMessage/SMS on the user's smartphone to send to their guest.

Additional Copying/Pasting Options are available to send via other app's on the smartphone

A system generated image of a pass with barcode can be sent via iMessage/MMS on the Resident's Smartphone. This pass is customizable.

A "Digital Wallet Card" can be installed on recipient's Smartphone using the built-in Apple Wallet (for iPhone) or using a Smart Wallet app for Android (We recommend "Pass2U Digital Wallet" on the Play Store)

The location of your guardhouse is encoded within the card and it automatically appears on the lock screen of the guest when they are within close proximity to your gatehouse(s)
