## Water-Wise House Call

By appointment, a Water Conservation Technician will come to your property, evaluate your water use and provide recommendations on using water efficiently indoors and outdoors.

A Water-Wise House Call takes approximately one (1) hour. To qualify, you must be living in the Rancho Murieta Community Services District service area and receive a bill from Rancho Murieta Community Services District.

## Water-Wise House Call Checklist

### Indoors

- 💧 Check all appliances and plumbing fixtures for water leaks
- 💧 Measure the flow of faucets and showerheads.

### Outdoors

- 🔧 Locate meter and irrigation controller, if applicable.
- 🔧 Perform landscape irrigation survey to determine efficiency of sprinklers.
- 🔧 Record water pressure and troubleshoot irrigation system.
- 🔧 Check and record root zones and soil types.

Before leaving the property, the technician will:

- 💧 Explain to the homeowner or resident the findings and recommendations. A complete report with the findings and recommendations will be mailed shortly after the Water-Wise House Call appointment.
- 💧 If applicable, provide training on how to use and reset schedules on the irrigation controller and how to read a water meter.

## Your Efforts to Improve Water Efficiency Will:

- 🔧 Provide water for our growing population and economy.
- 🔧 Conserve resources to provide safe drinking water for our children and grandchildren.
- 🔧 Reduce pollution in our streams by stopping wasteful runoff from our landscapes to storm drains.
- 🔧 Result in healthier, better looking landscapes.
- 🔧 Save energy in your home and in our community.
