**Subject: 2016 Diversion Report**

Dear Darlene:

Each year California Waste Recovery Systems is required to prepare and submit an annual diversion report for the residential collection services we provide through our Collection Services Contract with the Rancho Murieta Community Services District. This report summarizes the tons of solid waste collected and disposed, as well as the tons of materials recycled or otherwise diverted from disposal.

This report is for the period 1/1/16 through 12/31/16 and is prepared per the guidelines of Article 5, Diversion Requirements, and Article 14, Record Keeping and Reporting Requirements of the Collection Services Contract. Enclosed are the monthly detailed tonnage and diversion reports for all materials we collected through our Rancho Murieta Collection Services Contract in 2016.

As I have related in prior years, neither our Collection Services Contract with Rancho Murieta nor the Agreement executed between the CSD and Sacramento County require that any action be taken with this information or for you to report these results to any other agency. We already furnish quarterly tonnage reports directly to the Sacramento County Solid Waste Authority (SWA) and will continue to do so through the duration of the Contract because diversion is measured regionally for the unincorporated County. The tons collected in Rancho Murieta are part of that consolidated result.

The table on Page 2 summarizes the tons we collected in 2016 compared to those tons we collected in years 2010 thru 2015. Year-to-year comparison of 2010 and 2016 shows that the overall tons we collect have dropped 1% since 2010. Trash tons have increased by 2%, while the Recyclables tons have increased by 8%. Greenwaste tons decreased by 10%. Also interesting, bulky waste service requests have increased by 60% when comparing 2010 to 2016. This increase contributes to more trash tons and reducing the diversion rate.
